

UFED Maintenance Release

Cellebrite has released a maintenance version of UFED Touch/Classic 2.2.2.0 and UFED Physical Analyzer 3.8.6.

UFED Touch/Classic 2.2.2.0

UFED Touch/Classic 2.2.2.0 resolves issues related to the extraction method presentation in the UFD file, generated as a part of the BlackBerry® physical extraction. Previously, the wrong extraction method prevented automatic decoding when selecting the UFD file. BlackBerry physical extractions performed using UFED Touch/Classic version 2.2.0.0, can be viewed in UFED Physical Analyzer by using Open Advanced.

UFED Physical Analyzer 3.8.6

UFED Physical Analyzer 3.8.6 resolves the following issues:

1. Decoding of deleted SMS in some iOS extractions
2. Decoding of information from the detached memory card within Android devices.
